

GSA Alliant 2

Next Generation Solutions for Federal Agency IT Modernization.

Described by the General Services Administration as the next-generation contract vehicle, Alliant 2 is part of the GSA Network Services 2020 strategy. This indefinite delivery, indefinite quantity (IDIQ) program provides federal agencies with a flexible contract vehicle to modernize their IT communications and services. As a Governmentwide Acquisition Contract (GWAC), Alliant 2 is available to multiple agencies, offering customizable hardware, software, and IT solutions that can be purchased as a package.

Addressing Agency Requirements for Tomorrow's Needs Today

Lumen® holds EIS, IT Schedule 70, and Alliant 2 contracts, which provide government agencies with complementary vehicles that address current agency needs as well as anticipate future needs. The Alliant 2 Solution summary includes a wide range of information technology services to help agencies modernize, including:

- Cloud computing
- Big data
- IT services for integrated total workplace environment
- Cyber security
- Internet of things (IoT)
- Critical infrastructure protection & information assurance
- Digital trust and identity integration management
- IPv6 migration and upgrades
- Open source integration and customization
