86%
of CIOs say their role is becoming more digital and innovation focused.

Lumen Managed Services: Ignite value and growth with expertise for the digital world
Lumen delivers the experience and dedication you need to innovate, scale and drive efficiencies in your application infrastructure and network. Our Managed Services intersect and enable all applications and services on the Lumen Platform with advisory, project and ongoing capabilities across three key practices:
Network & Communications, Edge & Applications and Smart Solutions.

Empower innovation with management across environments
We provide services, support and optimize your network, communications, edge and applications so you can focus your teams on creativity and insights instead of maintenance. We show you how to take greater advantage of increasingly hybrid, distributed and diverse markets and work models.

Enable productivity by leveraging transformation
We provide managed network services and multi-environment orchestration to support better collaboration and connectivity with increasing connection and share across boundaries.

Maintain service levels while managing risk
We provide resilient, secure and urgent connectivity with critical compute and security services in the Lumen Platform and partner with leading performance and support post-implementation operations.

Our professionals have 2,950+ certifications across our technology ecosystem

Explore new opportunities to achieve your goals
Maximize the efficiency and innovation of your organization by optimizing your digital business with Lumen Managed Services.
