

# Introducing NorthLine

by Lumen RapidRoutes<sup>SM</sup>

High-capacity wavelength connectivity from Seattle to Minneapolis, designed to extend across Lumen's national network

**Seattle → Minneapolis** • Extending Across the Lumen National Network

**100G-400G**

capacity

**20-day SLA**

on qualified routes

**National reach**

without added providers

## What is NorthLine?

A high-capacity wavelength route connecting Seattle to Minneapolis, built as part of the Lumen RapidRoutes portfolio. It supports large-scale data movement between key markets while connecting into Lumen's broader network – extending traffic into a nationwide footprint. Well-suited for data center connectivity, multi-market expansion, and long-term network planning.

## Built for network expansion

**Nationwide reach**

No added carriers.

**Predictable delivery**

20-day SLA on qualified routes.

**Aligned to demand**

Near data centers and power.

**Scalable models**

Resiliency and growth-ready.

## Where it fits

- 01** Multi-market expansion
- 02** Data center and cloud connectivity
- 03** Primary and secondary route design
- 04** Forward capacity planning
