

Transforming finance with SASE

Lumen® SASE Solutions help the financial industry provide a distributed workforce with secure access to highly compliant information—without compromising on availability or performance.

How SASE can help boost and secure the finance industry

- 1** Remote worker is provided secure access to productivity apps using a ZTNA client connection to SASE cloud gateways
- 2** Data is securely shared using VPN access to the corporate data center from approved devices
- 3** Secure financial transactions are conducted across multiple devices, users and locations
- 4** Centralized policy management provides end-to-end visibility and control over the flow of apps and data traffic
- 5** Lumen manages monitoring and maintenance of the entire SASE solution

Potential benefits

Simplifying onboarding of numerous bank branches, limiting the need to code each local router manually

Securing work-from-anywhere access to sensitive financial data and high-performance productivity applications
