Transforming hospitality with SASE
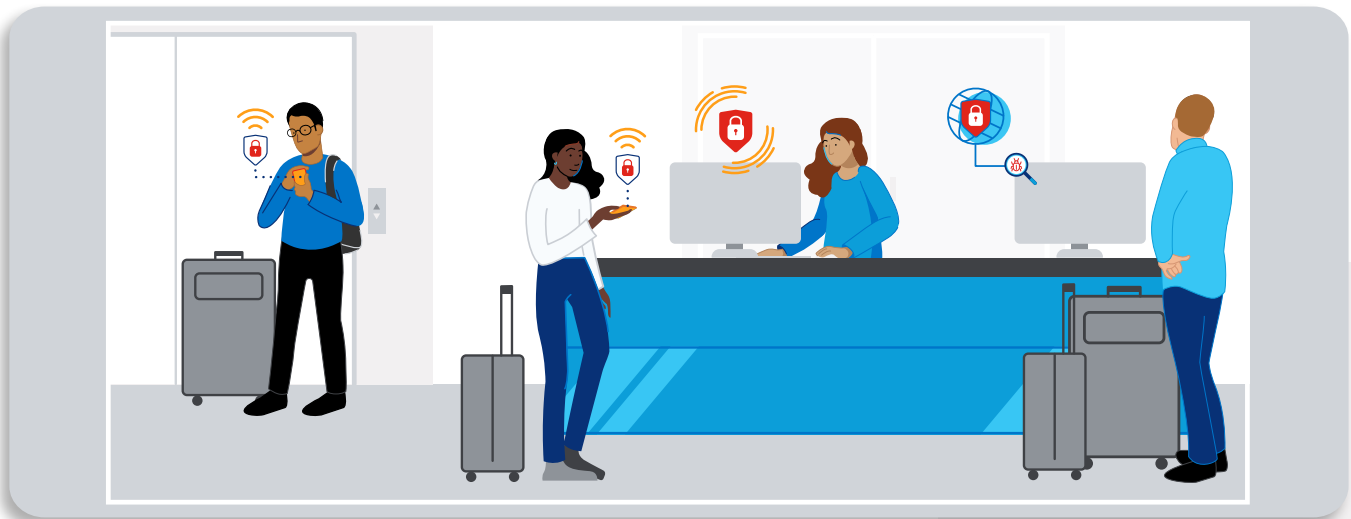

Hospitality providers require consistent, secure access to a wide variety of cloud-based apps and services. With customer needs varying from full product demos to at-home entertainment accounts, successful venues demand multi-faceted network segmentation.

Lumen SASE Solutions can provide the dynamic connections hospitality providers—and their guests—require.

How SASE can help secure and streamline the hospitality industry

1 Remote workforce traffic is secured with ZTNA to SASE cloud gateway

2 Guest Wi-Fi delivered independently and authenticated with metered access to secure, white-listed applications

3 Secure, dedicated access provided to conferences, events and retail tenants for high-performing application experiences

4 Comprehensive monitoring, maintenance and policy management tools, designed for flexible response to dynamic application demands

Potential benefits

▶ Providing secure anywhere access to applications containing sensitive customer data

▶ Balancing in-person services with autonomous, technology-driven interactions
