Transforming retail with SASE
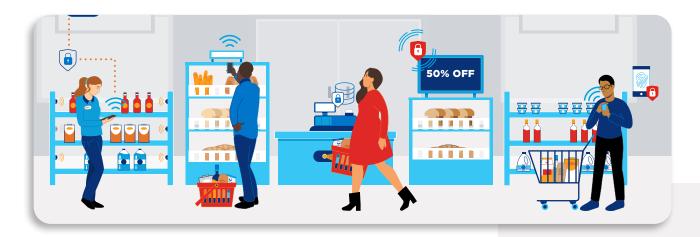

Today's digitally-savvy shoppers demand an outstanding experience whether online or in-store—and retailers are rising to the challenge with innovations such as mobile apps, smart checkout and enhanced eCommerce.

Lumen® SASE Solutions are designed to deliver the high performance and availability needed to help keep shoppers satisfied virtually anywhere, while maintaining enterprise-grade security across multiple locations.

How SASE can help power and secure the retail industry

1. Maintain productivity for highly distributed sales and retail staff

2. Secure application access from any device for select users

3. Centralize network and security policies for simplified management

4. Segment customer and internal application experiences

5. Relieve strain on IT resources with pro-managed monitoring and maintenance of the entire solution

Potential benefits

▶ Enhancing the shopping experience by routing traffic over the ideal network, helping to ensure seamless and reliable app performance

▶ Protecting consumer data and supporting PCI compliance for any user, on any device from virtually any location

▶ Simplifying the segmentation of security policies across the organization and shopper types
