

PRICING VOLUME APPENDIX 1

J.2 Networx Geographical Coverage Description

The geographic coverage information included in this document is summary level data by product, based on the service origination country/jurisdiction and country/jurisdiction termination data provided as part of Qwest's pricing submission. As such, the pricing data in the Networx Hosting Center (NHC) will be the source for any updates to this table as deliverable ID-4 in Section F of the RFP.

Since the information in this document is provided at the product level, origination or termination countries may not apply to all CLINs in the product suite. In addition, service originating in one particular country/jurisdiction may not terminate in all termination countries/jurisdictions listed in the table. For more detail on CLIN-level origination and termination, as well as origination-termination country/jurisdiction pairs, please refer to the corresponding pricing data in the NHC. For specific and current product and feature geographic availability information, the NHC data will always take precedence.
