Catalog products and services in this category may contain Generative Artificial Intelligence (GenAI). Prior to ordering, Executive Branch State Entities shall work with CALNET Contractor CenturyLink dba LUMEN to determine whether products or services to be ordered contain GenAI and comply with the requirements set forth in State Administrative Manual section 4986.9 GenAI PROCUREMENT, including but not limited to performing GenAI Risk Assessment (SIMM 5305-F).

Table 16.2.2.2.5 - Long Distance Network Access Transport

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: CenturyLink Dedicated Outbound Long Distance service provides local access to the CenturyLink national network via a local loop circuit using CenturyLink owned and operated facilities, third-party provider facilities, or customer-provided facilities. Dedicated long-distance call fees include monthly charges for the dedicated circuit and per-minutes-of-use charges for the terminating end of the call. On premise, long-distance routing equipment is needed to accommodate dedicated long distance. The national CenturyLink inter-exchange (IXC) network infrastructure combines the use of a traditional circuit switched platform with a next-generation voice services platform, supported by the latest technology.
Geographic Availability: Long Distance Network Access Transport service is available and may be originated in the contiguous United States and Hawaii.
Service Limitations and Restrictions: Customer terminating equipment not included. The cost for multiplexing is included in the local access fees. Reverse multiplexing has been added as an Unsolicited enhancement.
State Associated Administrative Fee (SAAF): All services in this catalog will have a 2% fee applied. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: CenturyLink Dedicated Outbound Long Distance service provides local access to the CenturyLink national network via a local loop circuit using CenturyLink owned and operated facilities, third-party provider facilities, or facilities you arrange on your own. Actual bandwidth and speed of circuits can vary from 56/64 Kbps or 1.544 Mbps up to 1 Gbps. Dedicated long-distance call fees include monthly charges for the dedicated circuit and per-minutes-of-use charges for the terminating end of the call. On premise, Long Distance routing equipment is needed to accommodate Dedicated Long Distance. Switched Long Distance call fees include per minute of use charges for both the originating and terminating ends of the call. Switched long distance does not require any additional equipment on the customers' premises.

Geographic Availability: Domestic Long Distance service is available and may be originated in the contiguous United States and Hawaii. Call origination service is unavailable in Alaska (unless via Toll Free or Calling Card).

Service Limitations and Restrictions: Domestic Long Distance calls are rounded up to 18-seconds initially and rounded up to 6-second increments thereafter.

State Associated Administrative Fee (SAAF):
All services in this catalog will have a 2% fee applied. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.

Table 16.2.3.6.a - Long Distance International Calling

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: CenturyLink provides high quality international long distance service over the CenturyLink International Voice Network. Long distance services from CenturyLink provide high-quality connections over our Multi-Protocol Label Switching (MPLS) OC-192 fiber optic SONET network. CenturyLink's Outbound International Long Distance Service provides the capability to originate an international long-distance call from any U.S. state (Hawaii is available for switched origination only), with the exception of Alaska, to over 250 international destinations. Mobile terminations are available in a majority of the destinations.

Geographic Availability: CenturyLink provides connectivity within the United States and to over 250 countries.

Service Limitations and Restrictions: International Long Distance calls are rounded up to 30-seconds initially and rounded up to 6-second increments thereafter unless noted below in column E. CenturyLink does not originate calls from any of these countries back to the US. To originate outgoing calls, the locations must be added to our International Long Distance matrix. Switched and dedicated international call origination are not available from Alaska and the U.S. territories.

State Associated Administrative Fee (SAAF):
All services in this catalog will have a 2% fee applied. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.

Table 16.2.5 – Audio Conferencing Services

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: The standard CenturyLink audio conferencing service is accessible from the domestic US as well as from international locations. Our audio conferencing bridges have the ability to support many access or port locations at the same time. We support the State's requirement of Reserved and Reservationless Conferencing.

The standard CenturyLink Audio conferencing service includes free access to the CenturyLink Conference Control Center (CCC) is an online portal that provides direct access to conferencing account information and supports the host of a conference call to Schedule, set up and control audio conference's.

The conference host can pick from a menu of polling options and allow end user to answer polling questions via touchtone keys. All that the end users need to access the CenturyLink audio conferencing services is a phone that has the ability to call a toll free OR PSTN access number. We support standard phone access, IP Phones, Cell phones, or any other end point that has the ability to call toll free or a standard PSTN access line.

Customer Administrators can customize the Conference Control Center with their department/agency logo and colors. These changes are made in real-time and are easily completed. Administrators also have the ability to set up accounts in real-time, delete accounts and resend account information.

Reservationless Conferencing

Reservationless service is an automated, on-demand audio service available 24x7x365. Reservationless Audio allows the moderator to control the audio portions of the call through Online Audio Controls Conferencing interface.

Reservationless Audio Conferencing—this service is a flexible conferencing solution that is secure and easy to use; because it is an automated, self-service solution, the customer has total control of the call, allowing him/her to conduct meetings anywhere, anytime. Reservationless Audio Conferencing will hold up to 300 telephone lines.

Reservationless GlobalMeet—this service provides the automation of Reservationless audio with the convenience of International Toll Free Service (ITFS) and Local Access for participants outside of the United States. The combination of ITFS and Local Access provides conference access from more than 100 locations around the world. Reservationless GlobalMeet is available for up to 300 participant lines.

Reserved Conferencing

If users prefer to reserve a call, need a one-time call, or are planning a call with more than 300 participants, a reserved conference will meet their needs.

Geographic Availability: Available within the contiguous United States

Service Limitations and Restrictions: None
