24.5.2.1 Extended Demarcation Wiring Services

Contractor's Description of Service:

Building Extension available to extend service from network demarcation point to the desired location within your building (i.e. floor, suite, etc.). Extending from the MPOE to your location When a telecom service is provided to a commercial building, it is typically delivered to the Minimum Point of Entry (MPOE)/Telco-Room. This demarcation point or "demarc" is generally the point at which you become responsible for the on-premise cabling and wiring. Depending on the building, the extension from the demarc to your equipment may be a substantial distance; therefore, it is important to investigate options early.
