

Lumen and Cisco

Enhance your business capabilities and maximize your budgets.

Lumen is a global network provider delivering end-to-end solutions for your company's voice and data networking needs by providing unified communications, security, data center, cloud, optical networking, telepresence, video and wireless services. We collaborate with leading technology providers in both hardware and services to help ensure your business communications needs are met. For state-of-the-art secure optical, Ethernet and/or software-defined networking capabilities, we work with Cisco® as a Gold certified partner with hundreds of Cisco certifications in architectures such as Advanced Enterprise Networks, Advanced Security and Advanced Data Center.

Cisco

Cisco simplifies the complexities of networking with products, solutions and services in the cloud era to transform the way we connect, work and live. Cisco removes the traditional constraints of networking to enable Lumen customers and partners to deliver automated, scalable and secure networks that connect the world.

Key benefits include:

- **Simplified networks:** Cisco delivers a common operating system across routing, switching and security to simplify operations.
- **Lower TCO:** Optimal space utilization, lower energy and cooling expense and a common platform help reduce the cost of installing, operating and managing your network.

Lumen and Cisco can create a unique IP solution built from the ground up for your business. **Ask us how to get started today.**

Lumen

Complete solutions: Our design, installation and maintenance services are available to solve your business networking and communications requirements; we provide an exceptional standard of service for your business voice and data needs.

Nationwide network: We have one of the largest fiber footprints in the U.S., capable of supporting 2.5 Gbps (OC-48), 10 Gbps (OC-192) and 40 Gbps (OC-768) transmission rates.

Financing: We offer multiple financing options for your convenience.

Commitment: We partner with best-in-class equipment providers for customized business voice and data solutions; we also employ highly skilled engineers who are trained to operate our state-of-the-art equipment.
