

Lumen® Managed Enterprise with Cisco Meraki

Managed by Lumen for fast Wi-Fi and network deployment, scalable growth and increased security.

Lumen Managed Enterprise with Cisco Meraki is a secure, simple Wi-Fi and networking solution with enhanced reporting — simply managed for your business.

Lumen Managed Enterprise with Cisco Meraki is a great fit for businesses that:

- Need a simple, secure Wi-Fi solution that can be centrally controlled and managed
- Need a fast and standardized Wi-Fi deployment and automated setup for business locations
- Would like to implement Wi-Fi networks with few IT resources and without breaking the IT budget
- Need visibility and control over the Wi-Fi network
- Need a Wi-Fi experience for customers that also promotes products and services
- Could benefit from more secure and efficient WAN network options and services

Lumen Managed Enterprise with Cisco Meraki delivers:

- A secure Wi-Fi and networking platform that you don't have to maintain or manage
- A managed model where you can pay monthly for what you need now and simple growth plans as your business grows. Device + Management and Management Only options available
- Exceptional employee and customer wireless experience
- The ability to promote your brand to your customers
- Unsurpassed visibility and control over your network using a simple, comprehensive web-based management tool
- Secure WAN networking options that improve network efficiency and security
