

Lumen Data Center Locations

Lumen Colocation provides an experience where you are one cross connect away from a world class, state of the art network and an ecosystem of other businesses and carriers

The Trusted Network for AI

Applications today are more dispersed than ever, existing in on-premises datacenters, cloud environments, third-party colocation facilities, and edge locations.

Lumen owns and operates approximately 200 carrier neutral Data Centers throughout North America which allow you to match our data center's key capabilities to your unique needs. Whether you require state of the art security and redundant power for your mission critical applications or low-density power for data storage and archives, we have options for you. Let Lumen get your data where you need it to go. Check out the expansive list of Lumen site locations and capabilities today.

Secure data storage virtually

If your in-house data center is no longer viable or your server room isn't ready for the cloud, Lumen can provide the right solutions at the right time to help you achieve your goals and grow your business. Many enterprises find that their IT infrastructure must support increasing demands, greater bandwidth, and higher availability. Lumen offers comprehensive Colocation Services that address the need for more with efficient, cost-effective, and flexible options

Benefits and Capabilities

Lumen Data Center Services combines secure, resilient, and managed data ecosystems with approximately 350,000 route miles of backbone to provide a comprehensive data infrastructure solution. With over 200 on-net data centers in North America, Lumen allows customers to easily scale data demands and expand into new regions. Utilizing our data centers enables IT teams to concentrate on critical business priorities instead of spending valuable time on on-premise maintenance, support, and disaster recovery. Customers not only save time and resources but also benefit from increased cost-effectiveness by eliminating hardware deployment expenses and transitioning to an opex model
