Lumen® Connectivity Services

Reliable and flexible networking solutions for future-ready businesses

Modern businesses rely on digital capabilities to serve their customers, employees and operations across every corner of the organization. As your company's ambitions evolve to incorporate big data, AI, cloud applications and other emerging technologies, your network's ability to adapt and excel becomes increasingly essential for the success of your business.

Boost performance, not complexity

Connect your digital ecosystem with simple, powerful networking solutions – even across various cloud and on-prem locations – so you can accelerate growth and productivity at a competitive pace.

Strengthen reliability for your operations

Fortifying your network with built-in cybersecurity and redundancy provides comprehensive security and visibility across your digital ecosystem, enabling your team to build with confidence while protecting you from costly interruptions and compliance issues.

Control costs with transparent pricing

Step into the driver's seat of your network with a robust menu of services and pricing models, an online portal that empowers you with cost and usage transparency and the ability to manage some services on-demand.

"We had close to 100 locations with unique circuits and carriers. Now we have a centralized ability to manage all of our [networking] through Lumen, which has really taken a load off me and my team... We're not just keeping the lights on—we're creating value. And Lumen is the backbone that makes it all possible."

– Doug Saunders
Chief Information Officer, Arctic Glacier

Common use cases

- Cost-effective connectivity for point-to-point, multi-cloud and hybrid cloud connectivity
- Fortify business continuity with secure, redundant connectivity that helps meet compliance standards
- Bandwidth expansion on-demand to help seamlessly manage network usage increases from AI and spikes from seasonality and data back-ups

LUMEN® TECHNOLOGIES

Features and Specs

On-demand services

Flexible, scalable internet and network services with options for pay-as-you-go pricing models and self-service adjustability. Solutions include:

- **Lumen® Intelligent Internet** to rapidly deploy dedicated internet connectivity across locations
- **Lumen® IP VPN On-Demand** for multi-site and cloud connectivity with dynamic WAN access
- **Lumen® Ethernet Fabric Connect** to connect point-to-point locations and clouds with private bandwidth of up to 400 Gbps

Lumen® IP VPN

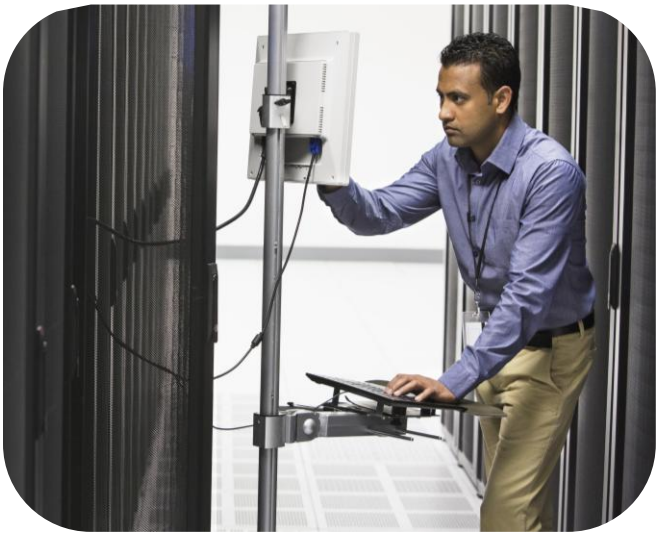

Secure, SLA-backed private network service that delivers high-performance, managed routing across customer sites, data centers, and public clouds

Lumen® Ethernet

High-performance, SLA-backed Layer 2 connectivity service that delivers secure, scalable private bandwidth between locations, data centers, and clouds

Lumen® Multi-cloud Gateway

Designed to simplify and accelerates multi-cloud operations by securely connecting clouds, data centers and enterprise environments, so teams can move data faster, reduce complexity, and scale AI and digital workloads with confidence.

The Lumen network offers up to **400 Gbps** transport, **100+ cloud on-ramps** and **2,200+ third-party data centers**.

Why Lumen?

Lumen delivers secure, high-performance connectivity built on one of the world's most expansive and deeply peered networks. With 30+ years of experience, we simplify complex networking challenges to help connect people, data, and applications across clouds, data centers and locations. Our continued investment in AI-ready infrastructure and metro expansion helps ensure your business is future-ready.
