

LumenSM Customer Premises Equipment (CPE)

Secure, next-generation enterprise networking equipment

Your premises networking equipment is essential to your business, providing connectivity to your services and customers. LumenSM Customer Premises Equipment (CPE) solutions offers a broad portfolio of expertise and services to help you keep your enterprise network running efficiently. Lumen offers CPE solutions based on products from industry-leading manufacturers such as Cisco, Juniper, Avaya, HPE, Ciena, Mitel, Infinera, Nokia, and ADTRAN. Our service capabilities extend from design and engineering to maintenance and management. Key features and benefits of Lumen CPE solutions include:

- Single point of contact (SPOC): Lumen can provide one-stop management of network and CPE solutions
- Wide array of equipment choices: routers, switches, access points, firewalls, IP PBX systems, Session border controllers (SBCs), software, servers and phones
- Tailored solutions that meet the exacting needs of our customers
- Point solutions that meet customer needs at an attractive price
- Nationwide field support
- VoIP readiness assessment services
- Implementation services
- Maintenance
 - Remote and on-site support
 - Move, add and change (MAC) activities
 - Remote alarm management
- Professional services
