
GSA EIS Cloud Services

Infrastructure as a Service (IaaS)

Provision, process and store network resources with on-demand, self-service, FedRamp-certified access for maximized control and scalability.

Software as a Service (SaaS)

Work easily in secure, proven applications without any of the system management headaches. CenturyLink SaaS offerings incorporate services from Microsoft and Akamai, including Microsoft Dynamics, Microsoft Office 365, Akamai Kona Site Defender, and Akamai Site Shield.

Platform as a Service (PaaS)

Give your developers the tools to design, develop, test, deploy and host web-based apps running on Microsoft Azure's public and government cloud servers.
