
GSA EIS Labor and Equipment

Cable & Wiring

Simplify all aspects of cable and wiring with our code-compliant End-to-end installation services for solutions offered under the EIS contract.

Lumen creates the needed documents before beginning work, including Engineering Detail Plan (EDP), Methods of Procedure (MOPs) and JHA documents. After service delivery, we provide a one-year warranty for workmanship of all our or subcontractor-installed premise wiring and cabling and pass the manufacturer's warranty for materials on to the government.

Service Related Equipment

Make it easier to meet the individual requirements of your agency by leveraging our vast experience in complex networking, telephony, data center, security and cloud solutions with standards-compliant equipment.

Lumen facilitates the development of solutions that use the right standards-compliant equipment. We support a wide range of Service Related Equipment (SREs) and work closely with hundreds of SRE vendors to help ensure that customer networks deploy high-quality, reliable and feature-rich SREs.

Service Related Labor

Gain service continuity, immediate access to new services to keep pace with a rapidly evolving market and customized solutions that supplement our core service offering to meet mission-specific needs.

Professional services augment staffing using our pool of subcontractors, many of which are small businesses. We practice comprehensive, repeatable and consistent processes with our internal and external teaming partners.
