## GSA EIS Voice Services

### **Circuit Switched Voice Service (CSVS)**

Our CSVS provides a wide range of voice services with the reliability, stability and flexibility and power of a well-engineered and highly redundant legacy network.

### **Internet Protocol Voice Service (IPVS)**

Choose from hosted PBX, premise-based, or hybrid IP services as well as managed LAN and SIP trunk services. Our certified engineers manage call servers, media gateways, routers and more—all on proven technology and service delivery platforms.
