

# Lumen® Hyper WAN<sup>SM</sup>

Purchase your next business network in minutes.

Businesses today require flexible, high-performance network connections that scale to meet critical application demands.

Lumen Hyper WAN provides two networks for one monthly service rate delivered by architecture that is easy to set up, maintain and scale. The online digital buying experience lets you design, price and purchase a mix of dedicated internet and MPLS IP VPN in as little as ten minutes per location and get your network up and running fast with automated service delivery.

## Flexible, reliable connections

For each of your locations, choose symmetrical bandwidth speeds for a custom mix of high-performance dedicated internet and secure MPLS IP VPN.

## Streamlined design and pricing

Get public and private networks for one low monthly service rate that includes location preparation and two built-in firewalls for secure outbound internet traffic from IP VPN-connected locations.

## Simple self-service

Use our intuitive digital experience to design, price, purchase and configure your Lumen networking services. Easily monitor performance and change features and services as needed.

Depending on your location and service configuration, Lumen Hyper WAN is designed to provide **up to 80% faster service delivery times.**

## Common Use Cases

- Business locations that require continual access to high-performing cloud-based applications
- Business locations that frequently access compliant customer information and require consistent availability
- Growing businesses that need to simplify and accelerate the addition of business locations, bandwidth and services

## Features and Specs

As the digital economy grows, businesses need a network that is easy to add, scale and change using a flexible online experience. Lumen Hyper WAN is simple to design, price and purchase in minutes with the tools to configure your service without leaving our online digital experience.

### Dedicated internet and MPLS IP VPN:

- Design, price and purchase via [lumen.com](http://lumen.com) or the Control Center portal
- Automated provisioning and centralized portal management with online status updates, notifications and ticketing
- Flat monthly service rate
- Universal service port currently supports Ethernet access with copper or fiber handoff
- Network performance metrics with SLAs for network availability, packet delivery and round-trip latency
- On-net and off-net Ethernet access only
- Choice of static or dynamic BGP routing
- Choice of IPv4 and IPv4/IPv6 addressing
- Symmetrical bandwidth options – 50 Mbps, 100 Mbps, 1 Gbps and 3 Gbps
- Included building extension service\*

### Lumen MPLS IP VPN only:

- Secure outbound internet traffic via two included managed network firewalls with the ability to add more
- A Class-of-Service (CoS) template supporting up to six application levels

\*Building prep for services such as site survey, equipment and wiring included up to \$5,000.

## Why Lumen?

Lumen operates one of the most highly peered global IP networks, delivering deep metro area access and connectivity to over 2,200 public and private data centers. We also deliver a network experience that is easy to set up, simple to purchase and fast to install—all supported on secure, stable architecture designed to connect digital businesses.
