and data management is the growth of networked edge computing locations, and related increase in

Connectivity Is Critical

Media and entertainment organizations recognize the importance of a robust digital infrastructure to help improve the customer experience, better enable content creation and delivery anywhere, and create tighter data linkages across channels.

Q. Looking ahead over the next 12 months

and beyond, how will your organization prioritize connectivity-related investments to improve agility?

to Hybrid Workforce

and Operational Resiliency

Customer Agility Customer-focused connectivity investments to improve the customer experience (e.g., augmented reality/virtual reality,

video interaction and content)

Operational Agility

Partner/Value Chain Agility

Business Agility Internal IT investments in connectivity to improve business efficiency and performance (e.g., 5G networks and devices, SD-WAN, etc.)

Employee-focused connectivity related investments to drive productivity (e.g., unified communications, remote work connectivity, or cloud-connected applications)

onboarding, partner management, or cloud-based contract management)
