

Lumen® IP VPN On-Demand

Stay agile with a dynamic network that adjusts to real-time business demands

Lumen IP VPN On-Demand empowers your business to leverage private data connections in a highly flexible manner. Rapid provisioning of Lumen® Network-as-a-Service (NaaS) products has revolutionized networking by enabling you to utilize your IP VPN connection within minutes of purchase. Further your business's ability to respond to change with the IP VPN On-Demand pay-as-you-go billing model. With rapid network delivery, scalable bandwidth, and pay-as-you-go billing, IP VPN On-Demand enables your business to become truly agile.

Data center interconnect

Establish connections between on-premises locations and data centers to enable efficient data transfer and communication across various sites. This is especially beneficial for organizations that operate multiple data centers or maintain hybrid cloud environments.

Secure connections

IP VPN On-Demand leverages Lumen's highly-stable IP VPN infrastructure to provide you with an innately secure network foundation that can be activated within minutes.

Operational agility

Capitalize on emerging business opportunities with a scalable, pay-as-you-go network activated in minutes.

Visibility and control

The Lumen® Control Center allows you to buy and manage your network remotely. IP VPN develops real-time network insights to help understand and respond to changes in network performance.

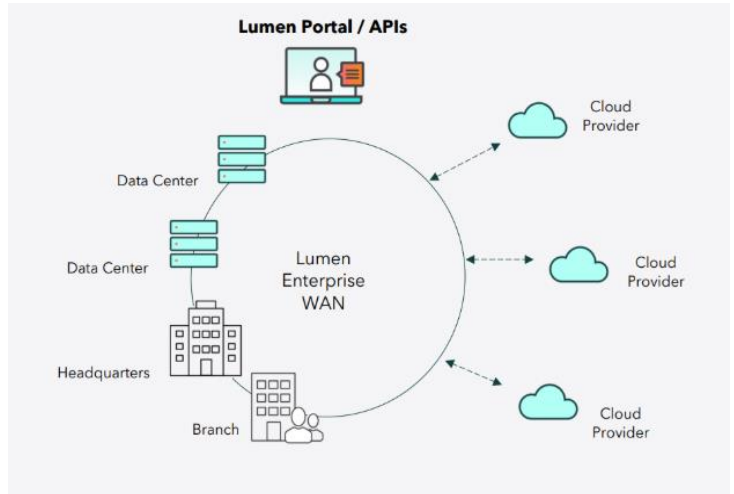

2 in 3 Global ITDMs say their network must accommodate all types of dynamic events¹.
