

Protect your data, reputation & revenue

Embed peace of mind into every stage of your digital transformation with award-winning cyber defense.

Supporting and maintaining security policies in a large enterprise can be challenging, especially with complex infrastructures and sophisticated, evolving attacks. With Lumen security solutions, you can safeguard your business using our risk mitigation features and automated threat intelligence powered by Black Lotus Labs to block malicious traffic and protect your digital ecosystem.

Defend against threats with unmatched visibility

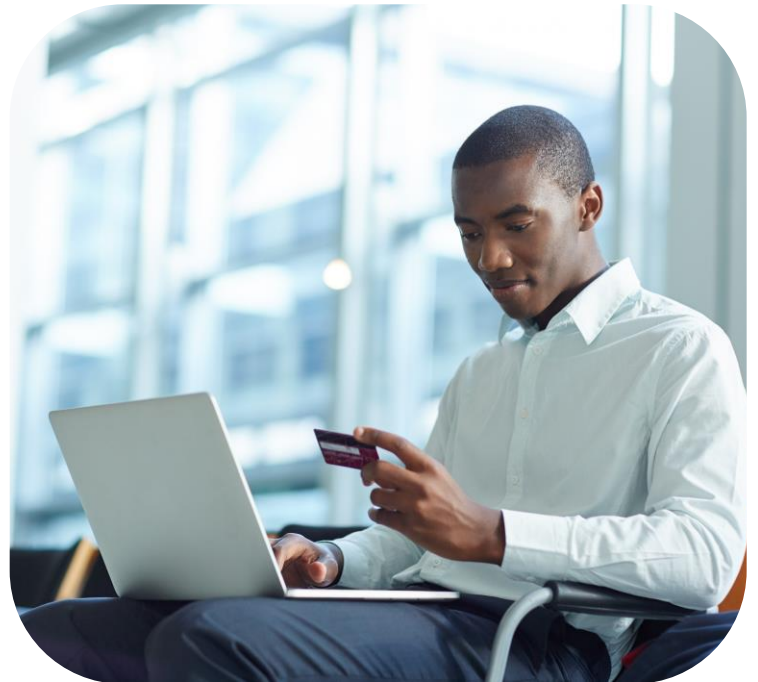

Stay ahead of potential threats. Our Black Lotus Labs threat intelligence team harnesses the power of extensive network visibility and machine learning to preemptively identify and neutralize threats before they impact your operations, fostering customer trust.

Control costs with security management

Our security solutions are designed to be cost-effective, reducing the need for extensive in-house security operations and allowing you to reallocate resources to strategic projects that drive growth. By leveraging our expertise, you may be able to achieve cost savings while improving your security posture.

Enhance performance by safeguarding operations

By swiftly identifying and mitigating threats, Lumen helps ensure that enterprise systems operate at peak efficiency. We'll help you reduce downtime and quickly resolve security breaches so you can rely on consistent performance, which is crucial to maintain customer satisfaction and a competitive edge.

Lumen DDoS Mitigation solutions can provide a potential ROI of **297%** over three years.

-Forrester, The Total Economic Impact™ Of Lumen DDoS Mitigation Solutions, April 2023

Common use cases

- **Endpoint security:** With hybrid work and the proliferation of IoT devices, it's crucial to secure endpoints that your organization doesn't directly control.
- **Data protection:** Controlling access to proprietary information and protecting it from unauthorized access is essential.
- **Threat management:** Streamline threat management across hybrid security environments to consistently deploy policy, monitor, and manage events.

Safeguard and empower your business with Lumen Security.

DDoS mitigation

- Quickly safeguard websites, applications or entire networks by rapidly filtering out malicious traffic while allowing good traffic through during an attack—**maximizing uptime and reliability.**

Application protection

- Our innovative approach combines real-time blocking against complex multi-mode attacks and the ease of cloud-native deployments—**all supported by a dedicated team of experts.**

Integrated network and security solutions

- [SASE solutions](#) help improve control, visibility and simplicity while **proactively blocking threats** via Lumen Rapid Threat Defense.
- Add Lumen Defender to Lumen Internet On-Demand or Dedicated Internet Access and **stop threats at the network's edge.**

Strategy and security services

- No matter where your organization is on its transformation journey, Lumen provides a range of consultative and [Security Operations Center type services](#) to enhance your security posture tactically and strategically.

Why Lumen?

Lumen is dedicated to unleashing the world's digital potential. We're igniting business growth by connecting people, data and apps – quickly, securely and effortlessly. We partner with our customers to simplify the complex, so you can focus on your core business.
