

Data Centre Colocation - Munich

Wamslerstraße 8, 81829 München, Germany

Facility Specifications

- Modern data centre facility situated on the eastern edge of Munich
- Operational since October 2000
- Technical space arranged over two floors
- Total Size: 6,114m²
- Fully Fitted Colocation space: 2,459m²
- Maximum Site Power: 6 MVA
- Carrier Connectivity: Lumen, Colt, DTag, M²Net, Versatel, BT.

Standards

- ISO27001: Certified
- ISO50001: Certified

Power

- 6 MVA supply via dedicated underground 10kV cable feeds to dedicated 3 x 2MVA 10kV/400V transformer station

Generators

- 2 (3 ultimate) x 2MVA diesel driven emergency power generators
- Generators tested monthly
- Fuel storage (diesel) for 24-hour continuous operation at 100% load

UPS

- 5 x 500kVA static UPS modules with N+1 redundancy
- Fifteen-minute battery autonomy per UPS module

Environment

- 750W/m² average cooling capability over the gross space - Temperature regulated to below 26°C
- Humidity regulated overall to 50%RH +/- 20%
- Technical areas positively pressurised to minimise dust ingress

Physical

- Minimum floor to ceiling height: 3,555mm from top of raised floor
- 650mm raised floor height
- Raised Floor loading 12kN/m²
- Structural Floor Slab:
 - Ground Floor - 25kN/m²
 - First floor - 10kN/m²

Fire Strategy

- Use of non-inflammable and low smoke zero halogen materials where possible
- No storage (especially of flammable materials) within technical space
- Building split into sealed, independent, fire compartments - Very Intelligent Early Warning (V.I.E.W.) detection above and below raised floor
- Smoke extract system activated by fire alarm
- Double Interlocked pre-action dry pipe sprinkler system

Security

- Remote 24/7 security monitoring with 2-factor authentication
- Full electronic access control system, based on proximity cards with photo and PIN keypads
- Locks on colocation suites and cabinets
- Card readers installed on private suites
- Intruder detection system on escape and riser doors

CCTV

- CCTV monitoring and recording of all access points and circulation areas

Facility Management

- Building Monitoring Systems (BMS)
- Location Operations and Control Centre
- Network monitoring system with critical alarm repeating to Regional Management Centre

Telecoms Infrastructure

- Facility is designed to accommodate standard rack/cabinets of 2,200mm nominal height
- Power is normally distributed under floor, fibre and copper cabling distributed overhead (fibre within a managed containment system, copper within a heavy duty ladder rack system)
- Fibre entry to the building is via two independent points

General Facilities

- Dedicated loading area - delivery hours 09:00-17:00 Monday to Friday
- Customer test room (52m²) & storage area (60m²)
- Goods lift - 2.0m wide x 2.4m high - maximum load 1950kg

Why choose Lumen Data Centre Services?

- Lumen operates more than 350 data centres in North America, Europe, and Latin America.
- Our Premier Elite, Premier Select and Premier data centres deliver scalable solutions to help customers grow their businesses, become more efficient, and reduce costs
- Direct access to the Lumen network in more than 45 countries
- Customised solutions to meet your specific space and power needs
- Professional Services provide remote support for implementation and network management and monitoring

About Lumen

Lumen is guided by our belief that humanity is at its best when technology advances the way we live and work. With approximately 450,000 route fiber miles and serving customers in more than 60 countries, we deliver the fastest, most secure platform for applications and data to help businesses, government and communities deliver amazing experiences.
