

Lumen Application Modernization Services

Reduce time to market. Deliver immersive customer experiences.

Lumen partners with enterprises to provide strategy, architecture, design development, and on-going support for all their application modernization requirements.

Lumen is a certified partner to the major hyperscalers and cloud technology providers. Our Application Modernization Services help enterprises prioritize their modernization plans and ensure platforms and technologies costs are aligned with business growth objectives.

INTERACTIVE GRAPHIC

Click on each section to explore capabilities

UI/UX modernization

Facilitate next-gen customer interactions with new technologies and platforms that deliver immersive experiences.

Cloud native application

Reduce time to market for products and services and accelerate business growth by building and delivering apps faster.

Data services

Monetize data as a strategic asset, and make faster informed decisions by transforming data into actionable insights with our Analyze-Visualize-Monetize service.

Operational efficiencies

Improve cost efficiency, business agility and competitiveness by automating day-to-day operations.

Lumen's strategic value:

Industry credentials

- We're a certified partner of Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform
- A channel partner of Alibaba Cloud
- A VMware Principal Partner – Cloud Provider and VMware Cloud Verified Provider

Experience

- Broad industry and functional expertise across many verticals, including manufacturing, healthcare, telecom, retail, e-commerce and financial services
- In-depth skills across market-leading toolsets and technologies
- Proficient in delivering effective solutions that deliver significant value to enterprises towards their IT transformational journey

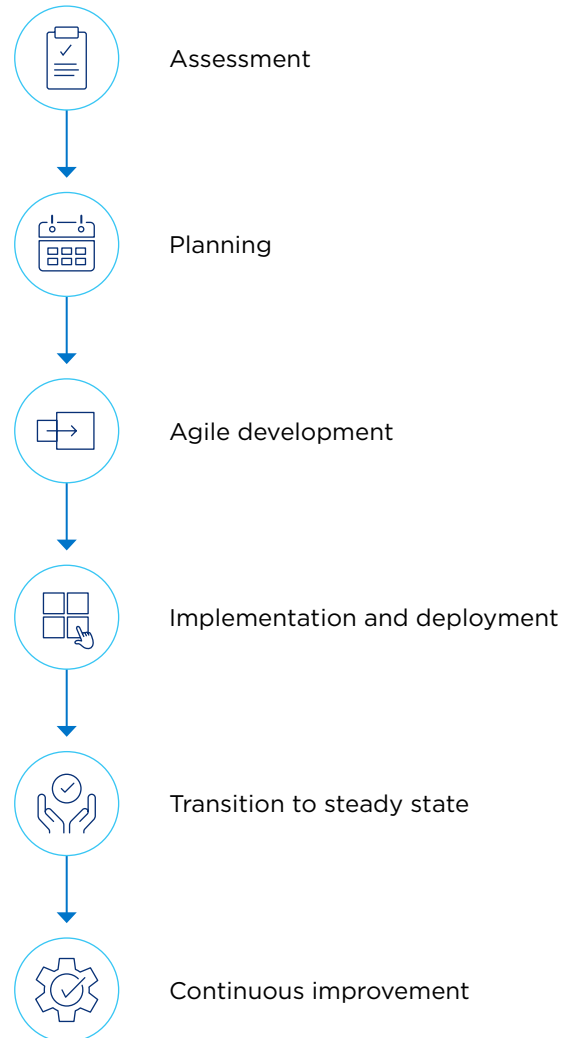

Agility and Quality Assurance

- Leverage agile development frameworks (e.g. Scrum) to accelerate time to market
- Mastery in designing and implementing DevOps processes specific to customer business needs, across the Continuous Integration / Continuous Delivery / Continuous Deployment (CI/CD) journey using Cloud Native and Open Source products
- Expert in leading testing techniques and methodologies, including Behavioral Driven Development (BDD), Test-Driven Development (TDD), Acceptance Test-Driven Development (ATDD) and Scrum methodology

Competitive pricing

- Support customer ROI demands with value-based pricing
- Competitive flexible pricing models offered via hybrid delivery models
- Fluid utilization of onsite, offsite and offshore resources
