Lumen® Dynamic Connections IP VPN

Guide to getting started

Use this document to get started with Dynamic Connections IP VPN. This includes registering for the Lumen® Control Center portal and obtaining Dynamic Connections IP VPN access within Control Center. *Please note, you need an existing IP VPN with Lumen. If you don't have one, please go through sales before starting the process below.

Registering for Lumen Control Center

1. If you already have access to Lumen Control Center, sign in here.
2. If you are an existing Lumen client but do not have access to Lumen Control Center, self-service register here.
   - To self-service register, you'll need the following information on your Lumen account, found on your scheduled invoice:
     - Billing Number
     - Invoice Number
3. If you are not an existing Lumen client, please contact Lumen here.

Obtaining Dynamic Connections IP VPN Access and Creating Connections – Guides:

1. Use these Lumen Control Center guides for step-by-step instructions on creating and managing Dynamic Connections IP VPN:
   - Creating a connection to AWS
   - Creating a connection to Azure
   - Creating a connection to Azure Gov
   - Creating a connection to Google
   - Creating a connection to Oracle

For additional support, please refer to the Dynamic Connections IP VPN Support page here
