

Lumen Enterprise Cloud Services for Microsoft Azure

Lumen Enterprise Cloud Services for Microsoft Azure is a convergence of **The Right Cloud**, **The Right Expert** and **The Right Services** to successfully enable your Enterprise workloads on Microsoft Azure, or a hybrid cloud architecture powered by a Lumen private cloud.

The Right Cloud

Running enterprise workloads on a public or hybrid cloud enables businesses to quickly respond to changing business demands. Moreover, leveraging the optimal deployment of public hyperscale and private cloud helps ensure applications can be agile and flexible, while still meeting the high availability, disaster tolerance, performance and regulatory mandates of Enterprise workloads.

The Right Expert

Engaging Lumen for your enterprise workload deployments on Azure helps ensure you are partnering with the one strategic partner you'll need to meet your desired IT and business outcomes. Lumen is an Azure Expert Managed Services Provider (MSP), as well as a VMware Cloud Verified Partner. Lumen has a decade of experience providing Cloud Hosting and Managed Services to Enterprise customers, including to Fortune 500 and Global 500 companies.

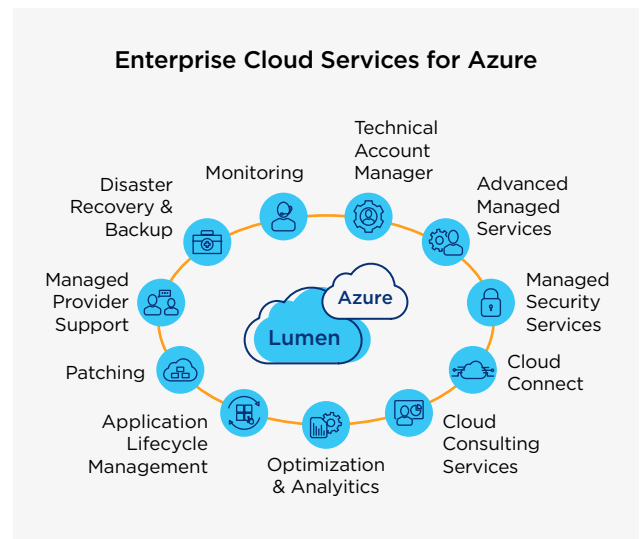

The Right Services

Lumen helps customers determine the Best Execution Venue for their business workloads. Lumen enterprise cloud services maximize the efficiency of technology, people and processes to minimize their operating infrastructure and application costs.

Lumen suite of enterprise cloud services for Microsoft Azure comprises of:

- **Lumen Private Cloud** – A managed Lumen Private Cloud solution on VMware Cloud Foundation, deployed within a Lumen global data center
- **Cloud Application Manager** – A single console for optimized cloud management of Enterprise applications and workloads across public cloud or hybrid cloud environments
- **Cloud Managed Services** – One-stop-shop of monitoring, patching and remote administration via automation by certified IT professionals
- **Advanced Managed Services** – Experienced Azure certified professionals to architect and elevate operational governance for public and Hybrid IT environments
- **Cloud Consulting Services** – Azure certified experts that can deliver end-to-end consultative engagements for Assessments, Designs, Transitions and Implementations
- **Managed Security Services** – A comprehensive portfolio of optional Network/Premises/Analytics and Threat Management/Consulting Security Services to help safeguard your digital business
- **Cloud Connect** – Secure, high-performance private connectivity to connect your on-premise network directly to your hybrid cloud environment
