

Lumen® Financial ConnectSM

Secure network with ultra-low latency to get actionable market data.

Financial Connect offers over 200 ultra-low latency exchanges and liquidity venue feeds across the Lumen® network. Life impacts stocks. Financial markets with a 1-millisecond advantage in trading applications can be worth \$100 million a year to a major brokerage firm¹. With the amount of data growing faster than analysts can predict, financial markets require a flexible platform with broader reach. Market fluctuations are not a one-time event but a continuous on-going challenge that will require a network that is agile and flexible to empower organizations to act quickly with their market data. Whether you are connecting to multiple cloud environments or need data to be at multiple locations, Financial Connect is the answer.

Market data is the lifeblood of financial markets. Whether it's price discovery, post-trade processing or portfolio valuation, Lumen delivers a secure, fully managed and highly resilient network designed specifically for the demanding needs of today's financial markets. Financial Connect is built to handle your pre-trade, order execution and post-trade requirements. And, with predictable and flexible pricing, you'll be empowered to keep up with changing market needs.

“ 200+ ultra-low latency exchange and liquidity venue feeds on our network. ”

The Lumen Network

- 200+ ultra-low latency exchange and liquidity venue feeds on our network.
- Over 2,200 connected public and private data centers across the globe.
- Capability to provide network services to customers in 110+ countries and 6,000 major metros.
- ~450,000 route fiber miles.

Product Features

- Provides real-time delivery of market data in raw format from the world's leading exchanges and alternative venues across a single platform instead of multiple individual connections
- Optimized for high performance, low latency delivery with redundancy over two physically and logically diverse networks
- Direct connections within major financial data centers in North America, EMEA and soon APAC, without requiring expensive local access loops
- Very granular monitoring of the Financial Connect network leveraging latency monitoring for rapid identification of service issues and remediation
- Customer portal that gives all customers access to real-time performance statistics between exchange and any point of the network.

How Financial Connect Addresses Market Challenges

- Provides raw market data quickly and securely.
- Removes bandwidth constraints for business-critical applications when there is a high demand to purchase or sell stock.
- Dedicated Support Team
 - Subject matter experts experienced in the support and access of the financial markets
- Simplified Pricing Model
 - Easy to understand and scalable to meet your ongoing requirements
- Customer Portal
 - Provides access to real-time performance statistics between any venue and any point on the network
