

# Lumen® Network Storage

## Pricing Guide

Lumen Network Storage delivers **agile storage and consumption of data at the source of the digital interaction**, enabling you to acquire, analyze, and act upon data to drive innovation.

Lumen Network Storage leverages an agile pricing model designed to offer advantages over other storage venues. Use this document to learn how Lumen Network Storage can optimize the cost-effectiveness of your data.

### Lumen Network Storage Pricing

#### Adaptive Block and File

**\$0.075**

GB/month\*\*  
plus IOPs usage

[TRY NOW](#)

#### Object

**\$0.025**

GB/month\*\*  
Network egress at no additional cost

[TRY NOW](#)

\*\*Listed rates are month-to-month, stated in USD, available to qualifying business customers and exclude all applicable taxes, fees, and surcharges. Services not available everywhere. Lumen may change, cancel, or substitute offers and services, or vary them by service area at its sole discretion without notice. Credit approval and deposit may be required. Additional restrictions, terms and conditions apply.

### Pay-as-you-go billing model

- Pay only for what you use with a monthly charge based on the service tier and amount of data stored
- Predictability and control over your data and costs

### No egress fees

- Lumen does not charge egress fees, which can significantly increase the total cost
- Don't pay twice for your data

### Decouple capacity from performance

- Lumen has separated the costs for amount of data stored and performance demanded by applications
- Many workloads are not consistently busy – most experience spikes in demand for short periods of time. This results in putting a more costly infrastructure in place to accommodate the busiest times, and at other times sitting idle
- Lumen Network Storage is charged on a base rate per GB, and measures the actual performance demand on an hourly basis. This extra performance is only charged when your applications need it

### Optimize cold storage costs

- Store data that is accessed less frequently from expensive public clouds to a more cost-effective setting – Lumen Network Storage
- Optimize costs by utilizing available storage venues based on requirements and pricing

### Why Lumen?

Lumen operates one of the most highly peered global IP networks, delivering deep metro-area access and connectivity to over 2,200 public and private data centers. We deliver a network experience that is built to be easy to set up, simple to purchase and fast to install – all supported on a secure, stable technology platform designed to connect digital business.
