

Lumen® Solutions for Webex Support Center Remote Support

View and control remote desktops over the web for instant, personalized support

Lumen Solutions for Webex Support Center Remote Support helps you, aid customers or internal users, regardless of their location. You can start an instant support session and bring in the resources you need to solve problems quickly. Observe and troubleshoot software and systems in real-time, even if the remote system is behind a firewall. Webex Remote Support is easy to use for both your customers and your support teams.

Optimize support

Enable better customer service and optimize compliance using network-based recording to document sessions, expedite incident resolution, and train new support staff. Access recordings easily from your Webex site. Use the detailed reporting function to analyze and help improve support processes.

Easily scalable & secure

Webex service that works across firewalls: Webex services are delivered on-demand over the global Cisco Collaboration Cloud. No software or hardware installations are required, making these services easy to implement and scale as your needs change. Security of your support sessions is assured using encryption technologies such as SSL and AES.

Enhance productivity

Deploy in public, private, and hybrid cloud environments on Lumen® Private Cloud on VMware Cloud Foundation™, Microsoft Azure, AWS cloud and others over a consistent application stack experience.

Lumen lets you meet with confidence using a web conferencing service that is simple, intuitive, highly reliable and makes it easy to host or join a meeting.

Common use cases

- Serve and support internal employees and external customers delivering personalized service through streaming VoIP with high-quality video.
- Improve customer satisfaction and time to resolution on the first call by troubleshooting and fixing issues directly on customer's remote desktops
- Simplify support staff experience by easily monitoring queue and remote support requests through a fully integrated WebACD system.
