

# Lumen Solutions for SAP

Built for the **intelligent enterprise**

In a work-from-anywhere world, enterprises are utilizing SAP to support seamless, centralized business processes and access to business-critical applications and data. But harnessing SAP S/4 HANA's potential has its challenges...

The **complexity** of managing multiple SAP and non-SAP applications.

The time, resources and expertise to affect successful **cloud migration**.

Moving from legacy to new technology, while **keeping TCO down**.

Migrating in a way that **supports wider digital transformation** initiatives.

## Introducing Lumen Solutions for SAP

Lumen's comprehensive Solutions for SAP will help you optimize your SAP applications for the needs of today.

Our expert consulting and managed services enable rapid and reliable access to business-critical SAP applications, data analytics, cloud migration and ongoing management.

### Consulting

We'll help design the right solution, considering your needs and IT architecture.

### Implementation

We migrate your existing SAP application to the cloud, based on your environment - fast.

### Managed Services

Continual monitoring and management optimize and automate for maximum value.

## Why Lumen makes sense for SAP...

### Gain 20+ years' SAP expertise

From a SAP Platinum retailer, with 1200+ experts.

### Enjoy 24/7 support

### Go global

With a secure network that enables you to deliver applications close to users, with low latency.

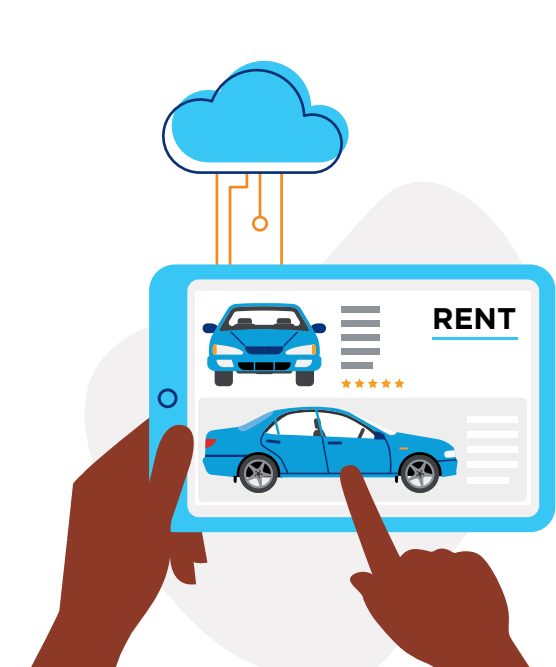

### Get the right fit

Thanks to flexible engagement models that cater for all businesses and budgets.

## A proven platform, designed for tomorrow

From manufacturing to retail, technology to healthcare, Lumen's secure platform for next-generation applications and data is powering the 4th industrial revolution.

### Preparing an international car rental company for growth

Our end-to-end approach and best-practice implementation replaced out-of-support SAP to deliver:

- Optimized, digital-ready operations and processes
- Modernized IT set-up
- Real-time business insights via embedded analytics
- Amortized implementation cost to assist with spend

### Reducing cost through app modernization for quick-service restaurant operator

By upgrading the business to SAP S/4 HANA, with embedded analytics, our customer:

- Realized significant TCO reductions
- Embraced the simplicity of a cloud-based solution
- Eliminated manual and offline transactions
- Achieved near real-time visibility of store performance

### Fast cloud migration & SAP upgrade makes Oil & Gas company future-ready

A comprehensive upgrade project helped this firm transform quickly, without disruption, with:

- Comprehensive shift to scalable, optimized landscape in just five months
- Full system changeover completed in one weekend, as planned
- Central dashboard to monitor infrastructure/SAP applications - and alert before issues arise
- Enhanced security and business continuity
