

Lumen Virtual SOC

Around-the-clock SIEM monitoring and expert incident handling by top security experts

Lumen Virtual Security Operations Center (VSOC) provides 24/7/365 SIEM monitoring and expert incident handling for quick response and resolution. Avoid insourced SOC expenses and leverage Lumen's security expertise to augment your detection and response strategy and receive remediation recommendations that go beyond just notification actions.

Improve your security posture

Develop your custom runbook and get 24/7/365 SIEM monitoring and incident handling to detect, analyze, and quickly respond to cyber threats. Our security experts augment your detection and response strategy and help you focus on actual events by identifying and closing out false positives and tuning use cases in your SIEM platform. They will also perform deep-dive analytics and treat hunting to provide remediation recommendations.

Cost-effective security support

Lumen Virtual SOC provides expert around-the-clock SIEM monitoring while minimizing labor and CAPEX expenses. We leverage existing SIEM investments made by your organization and have three standard packages available to help mature your security strategy and fit your business and budget needs.

Top security expertise

Lumen's seasoned security experts log into your environment and apply years of solid security expertise to deliver the Service. Our team has unique access to threat intelligence through Black Lotus Labs®, and lessons learned from protecting Lumen's extensive network to provide you with remediation recommendations that go beyond standard notification actions.
