

Unleash rapid growth with Lumen network solutions

Transform your network for the digital era

In today's digital-first enterprises, you need a network that can keep up with the demands of your customers, employees, and partners. To support these needs, your network needs to be scalable to support cloud-based applications, data analytics, AI and other emerging technologies to take your business' growth to the next level.

Accelerating digital transformation

Build, streamline and manage a digital ecosystem powered by cloud-based applications, IoT devices, and more to accelerate growth, productivity and innovation.

Driving efficiencies, simplicity and savings

Maximize efficiencies with a flexible and cost-effective network solution that has transparent pricing and innovative tools, while providing a single technology provider and a consolidated network platform.

Protecting your business from digital threats

Lumen combines its extensive network visibility, Black Lotus Labs threat intelligence, and dedicated security expertise to deliver proactive and comprehensive security services to protect your network, data, and customers from cyber threats.

Common use cases

- End-to-end secure hybrid cloud application performance
- Low-cost, simple and scalable connectivity across multiple locations and data centers
- Bandwidth on-demand for continuity during seasonal spikes in network capacity usage

“ The Lumen solutions that we have for our network have allowed for broader fan engagement. [...] With Lumen being there by our side as a partner, it's been huge for us to be able to offer that fan engagement and those added features within our environment flawlessly.”

– **Charles Harris**

VP of IT, Tampa Bay Buccaneers

TECHNOLOGIES

Featured Lumen networking solutions

Dedicated Internet Access (DIA)

- High speed internet connectivity that is secure, dedicated, and reliable to enhance your business performance and collaboration. Lumen network bandwidth adapts to your business needs, supports growth, and provides capacity for seamless business operations. [Learn more](#)

Secure Access Service Edge (SASE)

- Flexible, secure, and easy-to-manage architecture to address today's complex network and security requirements with simplicity, improved control, and visibility for business growth. Lumen security solutions proactively blocks emerging threats that are detected by Black Lotus Labs' unmatched network visibility. [Learn more](#)

Software-Defined Wide Access Network (SD-WAN)

- Support secure, scalable, and cost-efficient deployment and management of hybrid networks. Lumen helps customers reduce network complexity by providing technology and expertise to design, deploy and manage your entire hybrid network. [Learn more](#)

According to a recent survey, over the next 3 years, businesses plan to invest in: cloud services, WAN/network security, network infrastructure, AI and managed network services.¹

Why Lumen?

Lumen is dedicated to unleashing the world's digital potential. We're igniting business growth by connecting people, data and apps – quickly, securely and effortlessly. We partner with our customers to keep the complex simple so you can remain focused on your core business.
