

Lumen® Managed Video Conferencing

Leverage your existing network for simplified collaboration.

With ever-changing working environments, relying on in-person meetings for mission-critical, high-touch decision making is no longer a failsafe solution. Lumen Managed Video Conferencing fully managed services allow you to connect face-to-face with employees, customers and partners around the world—while working virtually anywhere. Leveraging an IP VPN-enabled, global network, we seamlessly deliver the maximum quality video and other applications through a single VPN port and local loop.

Fully managed

Our tenured video operations team provides a fully managed end-to-end solution allowing for worry free collaboration between geographically dispersed employees, customers, partners and suppliers around the world at a moment's notice.

Cost-effective

Our converged IP VPN-enabled global network can cost-effectively provide the reach, efficiency, flexibility and quality you need to realize the true value of video conferencing.

Interoperability

We developed an interop platform with supported IP video capability that allows you to connect to standard, high definition and telepresence equipment across the globe.

Technical features and capabilities

- Interoperable with traditional video conferencing systems
- Low-jitter MPLS WAN
- A single URL for accessing large events
- Simple onboarding: No downloads or plug-ins are required
- Global fiber optic network to provide maximum reliability and availability
- MPLS connection with quality of service (QoS)

Leverage powerful, owned-fiber reliability

What sets us apart is the combination of our long-tenured service team members and the fact that our communication platform runs on the same powerful, owned network used by our data and voice customers, which allows us to streamline your video delivery and control your conference quality. We equip you with load balancing, dual provisioning, failover and alternate routing to other bridges as benefits of our disaster avoidance strategy. Our strong intercarrier relationships help to leverage our existing carrier volumes and relationships globally for aggressive pricing solutions, prompt service delivery and fast trouble resolution.

Why Lumen?

The Lumen Collaboration Solutions suite offers a range of audio, video and web conferencing services that help you boost workplace productivity while maximizing your organization's time, resources and global communications.
