

Lumen® Network Storage

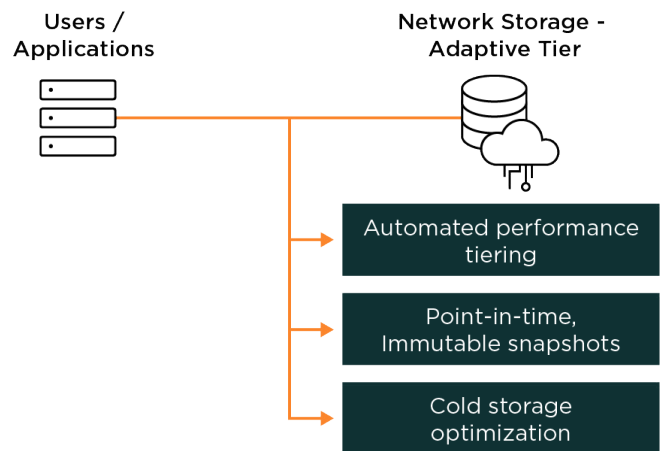

Use case – meeting compliance requirements

Business Challenges and Objectives

- Data retention is legally required for 7-10 years
- Data is stored on local devices, increasing costs and challenging capacity management and scalability
- Compliance, legal, and security requirements must be met according to industry requirements (legal, finance, etc.)

Lumen Solution

- Lumen Network Storage Adaptive Tier for file sharing
- Automated data tiering from primary storage to Network Storage Object Tier for long-term retention
- Customizable point-in-time snapshots providing version control, storage efficiency, and immutability to meet compliance, legal, and security requirements data center
- No data egress fees

Expected Business Outcomes

- Compliance, legal, and security requirements are met and configured through a self-service portal
- Scalable data solution for efficient management of increasing retention requirements
- No local infrastructure to purchase or maintain
- Budget optimization and efficient allocation of resources through eliminating egress fees, a predictable pricing model, and cold storage optimization
