Lumen® SASE Network & Security Bundles

Protect your enterprise from cyberattacks with Lumen's unified network and security solution featuring Versa SASE.

Lumen is offering a comprehensive network and security bundle, which incorporates our managed Secure Access Service Edge (SASE) solution. This package features advanced network security technology from Versa Networks, integrated with Lumen global Internet backbone.

Lumen SASE with Versa enables enterprises to design and control their network and security architecture. This provides end-to-end visibility and control, consistent security enforcement, optimized application performance, and simplified administration.

The solution offers a single-pane-of-glass interface for managing users, devices, applications, automates traffic classification, and supports fast threat response. This results in consistent security across various platforms and user types, dynamically updates policies, and reduces operational expenses by consolidating networking and security capabilities into a unified framework.

Network and Security Features

Next-Generation Firewalls (NGFW) Stateful firewall and Geo-IP based firewall rules include IPS, content filtering, application control, IP filtering and URL reputation. NGFW provides network security capabilities to inspect and control network traffic.

SD-WAN A dynamic, centralized cloud management platform enhances protection against vulnerabilities, increases application control, improves networking performance resiliency, and optimizes bandwidth utilization for greater efficiency in multi-site deployments.

Zero Trust Network Access (ZTNA) Shift from implicit to explicit trust by creating application-specific level access, while providing IT control and visibility into who and what is connected to your network.

Professionally managed service by Lumen employees.

Centralized management, reporting & analytics Lumen SASE includes automation tools.

All Packages Include:

- Lumen® Dedicated Internet Access
- Versa premise device
- SASE capabilities: SD-WAN & NGFW
- Straightforward bundle pricing

Design Consultation:

- Best Practices Assessment
- Custom Design and Configuration
- Security Policies

Solution Orchestration:

- Dedicated project management for both network and security implementation.
- Coordinated delivery and turn-up of network and security services.

Bundle Pricing:

Bundle	DIA BW*	Device	MRC**
Premium	GigE	L-1515A	$1035
Plus	500 Mbps	L-1515B	$818
Essentials	100 Mbps	FWA1012	$590
Essentials	50 Mbps	FWA1012	$540

2 site minimum
*On-net pricing shown – Offnet pricing available
**Monthly Recurring Pricing (MRC) with 36-month term

Rate available to business customers purchasing new Lumen SASE and DIA services and requires a 36-month term agreement. Rate includes port, access and logical service for non-burstable DIA, SASE pro-managed service, single device with SD-WAN and security licenses. Rate excludes installation, optional add-ons, building extensions, construction charges, taxes and fees which are all additional charges. Early termination fees will apply as set forth in customer's agreement. Customer must remain in good standing and rate may terminate if customer changes their account in any manner including, but not limited to, their service location. Services not available everywhere. Lumen may change, cancel, or substitute offers and services, or vary them by service area at its sole discretion without notice. Credit approval and deposit may be required. Offer may not be combined with other offers. Additional restrictions, terms and conditions apply. Listed bandwidth varies due to conditions outside of network control, including customer location, equipment, access through a wireless connection, and is not guaranteed.
