

VOLUME 2, SECTION 2.10 (continued):

BILLING

1.1.1 2.10.4 Network Program Information Exchange

As a technology company, Level 3 understands the importance of the Network Program's goal of increasing efficiency through the use of automated systems.

Our commitment to customer care includes providing multiple media and formats so a customer can receive the requested data—an electronic invoice, a report, a billing file or a payment confirmation receipt—in the most useful format.

The Level 3 preferred methods for providing customers information are to push the desired information directly to the customer's site through a web service or FTP location or to grant the customer access to the appropriate Level 3 system for direct download. Upon request, Level 3 will email information or create a CD. Level 3 supports the Network Program requirements to provide FTP security extensions, HTTP, and secure HTTP.
