Introduction and Background

Level 3 values the critical need of solid best in class software verification and testing. Our disciplined approach enables us to evaluate and assess our integrated software during each phase of the software life cycle. We ensure that quality is built into the software during the development and the software meets the user requirements

Based on the project specific requirements Level 3 supports the following types of techniques and tools:

[Redacted]

1.1.2 Statement of Scope

Level 3 will prepare an OSS Verification Test Plan in accordance with the requirements of Section C.3.9, Operational Support Systems, and Section E.3, OSS Verification Testing. We will develop and execute the OSS Verification Test Plan to verify that its OSS meets the requirements of Section E.3, Verification Testing of the Contractor's Operational Support System after Notice to Proceed is given by GSA.

The OSS Verification Test Plan will include acceptance of an order for each of the services specified in C.2 Technical Requirements that we have contracted to provide.

Application Overview: (3)Enterprise portal provides an end-to-end OSS approach supporting online functions as specified in the GSA's Networx program for billing, service ordering, customer support, service management, inventory management and program management. By using the (3)Enterprise portal, Government agencies can dramatically shorten provisioning times and obtain internal cost savings due to increased efficiencies, greater customer satisfaction, and the increased business resulting from such services.

2.13.4 Networkx Verification Testing

2.13.4.1 Networkx Services Verification Test Plan

Level 3 will provide a Networkx Service Verification Test Plan 60 days after notice to proceed as specified in Section E.2.2 of the Networkx Enterprise RFP. This plan will document

in detail each service, the test procedures used to ensure KPI/AQL compliance, and change procedures to request additional testing as required by Agencies.

1.1.2.2 2.13.4.4 Procedures for Adding Service-Specific Test Plan Attachments

In the event that a service-specific test plan attachment needs to be created, the Government Agency can notify the Level 3 Contractor Program Office (CPO) of a requirement for a specific test plan. The Level 3 CPO will then work with the Level 3 Operations and Engineering teams to develop a test methodology that can be used to meet the Agency's requirements [REDACTED]

1.1.4 2.13.6 Change Control [C.3.9.2.3]

Level 3 reviews all changes to determine the impact to customers, services and network performance. For all changes that may directly affect the Government or any agencies using the Level 3 Network (from services to OSS, like (3)Enterprise), we will provide notification, per the OSS Change Management Plan.
