

Lumen and InteProIQ

Cyber security solutions

Building a culture of security

Training is the least expensive, yet most broadly cost-effective step any organization can take to prepare for the seemingly inevitable breach. Through email phishing simulations and cyber security training, Lumen and InteProIQ focus on the human elements of cyber security. By building a culture of security within an organization, employees are empowered to act as a strong first line of defense.

Email phishing simulation ONEPHISH™

OnePhish allows organizations to send out phishing emails to employees, testing them and ultimately preparing them for real attacks.

Automated workflow: Step-by-step instructions make creating tests quick and easy. No training is required to conduct testing, allowing anyone within the organization the ability to administer.

Centralized control: Easy-to-use dashboard provides a single location to see the status of all tests, including those awaiting authorization, scheduled or running.

Template library: Create phishing tests entirely from scratch, or utilize the template library, offering 50+ industry- driven templates.

Advanced reporting: Comprehensive reporting allows administrator(s) to see summary reports for a high-level view or detailed reports on individual employee actions. All data can be exported for use in other systems.

Cyber security training WORKWISE™

WorkWise™ provides cyber security awareness training to employees, empowering them to act as the first line of defense for any organization.

What every employee needs to know

Entirely online, the suite of seven training topics are built to increase employee awareness of cyber security threats and reduce the risk of organizational security breaches.

Time commitment

Total time commitment is approximately 90 minutes for all seven training topics to be completed. Self-paced training is bookmark capable allowing flexibility for the busy employee.

Certificate of completion

Upon completion of assigned training courses, employees will receive a downloadable certificate of completion.

Advanced reporting

Comprehensive reporting capabilities allow administrator(s) to see the progress and completion by employee, course and curriculum. All data can be exported for use in other systems.

Lumen Professional Security Services extend our vast network of security expertise through hands-on support for organizations battling limited or overtaxed resources so you can refocus your highly specialized security staff on what's most important to your business.
