

SAP Ecosystem on AWS

Lumen SAP Ecosystem on AWS is a convergence of **The Right Cloud, The Right Expert** and **The Right Services** to successfully enable your SAP workloads on Amazon Web Services (AWS) or a hybrid cloud architecture powered by a Lumen private cloud.

The Right Cloud

Running SAP and SAP HANA applications on AWS or a hybrid cloud enables your business to be more agile and cost-effective than running SAP solely on-premises. The global footprint and resilient platforms of AWS and Lumen help ensure applications can be agile and flexible, while still meeting the high availability, disaster tolerance, exceptional performance and regulatory mandates of SAP workloads.

The Right Expert

Engaging Lumen for your SAP and SAP HANA deployments on AWS helps ensure you are partnering with the one strategic partner you'll need to meet and accelerate your desired IT and business outcomes.

Lumen is an AWS Managed Service Provider, Advanced Consulting Partner and Direct Connect Partner, as well as SAP Certified in Cloud Operations and SAP HANA Operations Services. Lumen has years of experience deploying and managing SAP and SAP HANA deployments for Enterprise customers. Global capabilities include a Basis Bench of 200+ practitioners, an SAP Functional Bench of 800+ practitioners, and 1500+ QA/Testing resources for Regression and Performance testing.

The Right Services

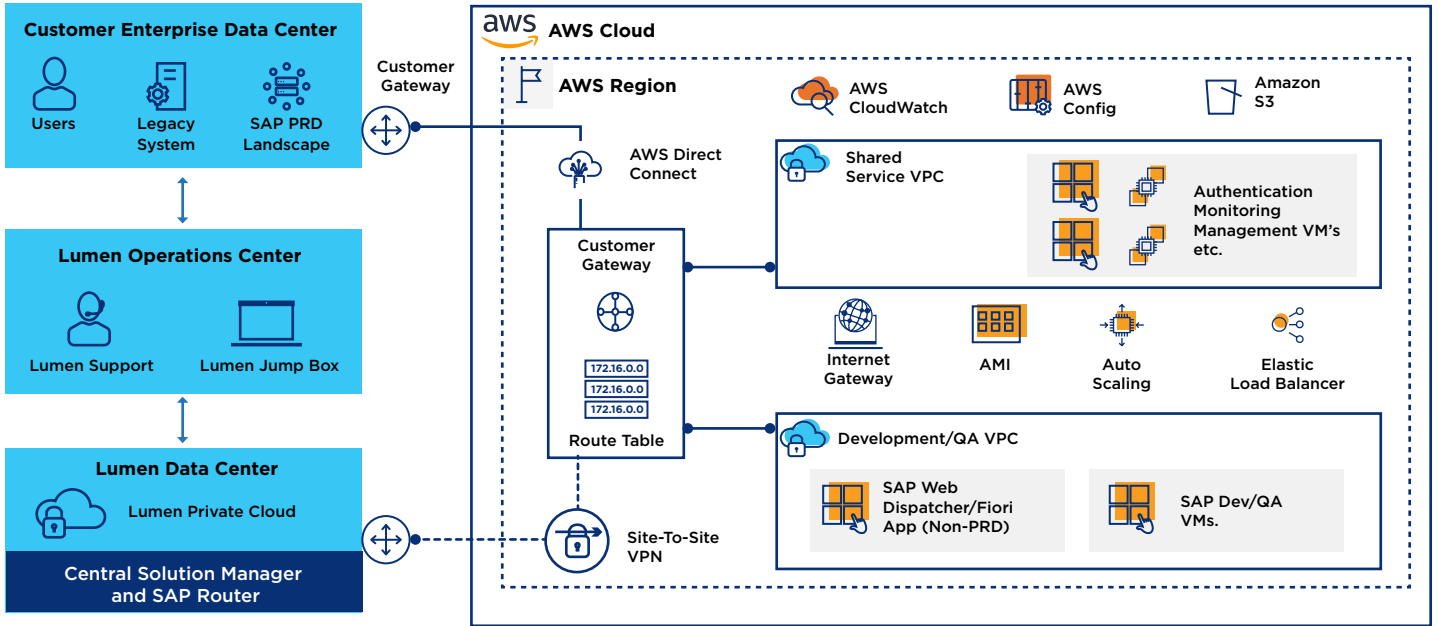

Lumen helps customers determine the best execution venue for their SAP workloads. Lumen SAP Ecosystem on AWS solution comprises of:

- **Application and Infrastructure Management Services** - 24x7 ITIL-based Monitoring and Management services for SAP workloads and AWS/Lumen environments
- **Advanced Managed Services** - Experienced SAP and AWS certified professionals to architect and elevate operational governance for AWS and Hybrid IT environments
- **IT Consulting Services** - SAP and AWS certified experts that can deliver end-to-end consultative engagements for Assessments, Designs, Transitions and Implementations
- **Managed Security Services** - A comprehensive portfolio of Network/Premises/Analytics and Threat Management/Consulting Security Services to help safeguard your digital business
- **Network Services** - Redundant, high-capacity fiber optic global backbone, coupled with in-country Metro Rings and Lumen Cloud Connects to meet the performance and resiliency requirements of SAP workloads

Lumen leverages its years of industry experience and best practices to deliver well-architected enterprise SAP Ecosystem solutions on AWS.
