

Lumen[®] Solutions for Zoom

Seamless cloud collaboration anytime, virtually anywhere.

Businesses today need a secure, reliable way to stay connected and innovate from anywhere. Lumen Solutions for Zoom enables organizations to migrate from premises-based communication to the cloud securely and efficiently help boost productivity, agility, and customer engagement. This solution combines Zoom's video-first unified communications platform with Lumen's Tier 1 global network, managed services, and UC&C expertise, designed to deliver an exceptional experience for meetings, voice, and contact center.

With Zoom One, everything needed for collaboration: meetings, chat, phone, and whiteboard is bundled into an intuitive experience that simplifies management and accelerates onboarding. Lumen offers seamless integration, lifecycle support, and optimized performance across hybrid work environments.

End-to-End Managed Services

Lumen provides full lifecycle support—from planning and deployment to optimization and adoption so businesses can minimize complexity and risk while facilitating cloud migration.

Global Network Strength

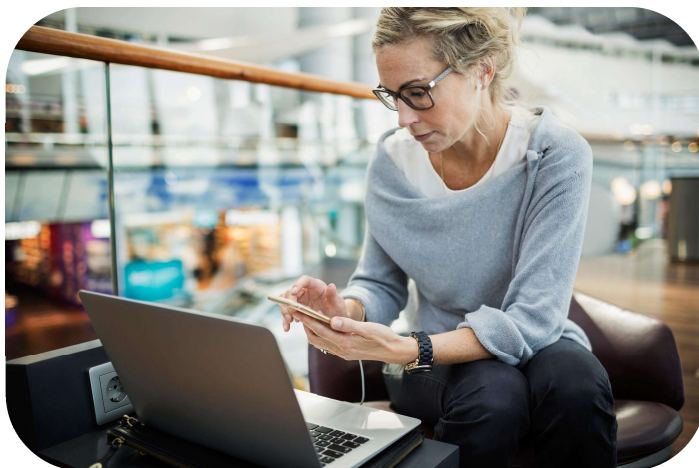

Built on Lumen's Tier 1 IP backbone, the solution enables low latency, high reliability, and exceptional call quality for Zoom services worldwide, to help deliver a consistent experience for hybrid workforces.

Transparent & Low Costs

With license-based pricing and integrated services, organizations avoid large capital investments and can benefit from a lower total cost of ownership compared to traditional on-premises systems.

Simplified Billing & Single Vendor Experience

Lumen consolidates software, hardware, and services into one invoice, minimizing administrative overhead and making vendor management easy for IT teams.

"84% of organizations that have adopted cloud-based UC&C and voice solutions saw improved quality and reliability of communications and 83% noted increased productivity among remote/hybrid workers."

- IDC Research¹

Common use cases

- Seamless collaboration for remote and in-office teams
- Modernize telephony with Zoom Phone and Lumen's global connectivity
- Drive improved CSAT and reduced handling time with Zoom Contact Center and Lumen Managed Services
- Replace fragmented tools with an integrated solution for meetings, chat, and voice
- Accelerate transition from on-prem systems with expert guidance and transparent costs

Key Features and Specs
